UNALYZE PRICE LIST AND PLAN SPECIFICATIONS

Schedule 1 to the UNALYZE Terms of Service
Version 1.0 dated November 1, 2026

This English version is a translation; the contract is concluded in Czech (Section 1.8 of the Terms of Service); in case of any discrepancy, the Czech version prevails.

1. Introductory provisions

1.1. The UNALYZE Price List and Plan Specifications (the "Price List") is a separate Schedule 1 to the UNALYZE Terms of Service (the "Terms of Service"). It contains the prices, the currency, the length of the billing periods, and the features and limits of the plans (Section 1.6 of the Terms of Service), as well as the supported platforms, technical requirements, and compatible methods of obtaining data (Section 4.6 of the Terms of Service).

1.2. The service is provided by UNALYZE s.r.o., Company ID No. 29853575, with its registered office at Nové sady 988/2, 602 00 Brno, email info@un-alyze.com ("we"). The terms "service," "Website," "user account," "trading account," and "subscription" have the meanings given to them in Section 1 of the Terms of Service.

1.3. The service retrieves or receives data on trading accounts and evaluates their historical results (Section 4.1 of the Terms of Service). It does not provide recommendations to buy, sell, or hold financial instruments, and it does not receive or execute trade orders (Section 4.2 of the Terms of Service).

2. Plans and prices

2.1. We offer the service in the Free, Challenge, Funded, and Scaled plans. The Free plan has no fee. You can order the paid Challenge, Funded, and Scaled plans with a monthly or annual billing period at the following prices:

Plan	Monthly billing period	Annual billing period
Free	No fee	
Challenge	**EUR 19 per month**	**EUR 180 per year** (equivalent to EUR 15 per month)
Funded	**EUR 29 per month**	**EUR 276 per year** (equivalent to EUR 23 per month)
Scaled	**EUR 59 per month**	**EUR 564 per year** (equivalent to EUR 47 per month)

2.2. The prices are final. We state them in euros (EUR) and also charge them in euros.

2.3. The monthly billing period lasts one month, and the annual billing period lasts twelve months. You pay the price in advance for the entire billing period, and the subscription renews automatically for a period of the same length (Sections 5.1 and 5.3 of the Terms of Service).

2.4. The annual price is the full price for twelve months, which you pay in advance in a single payment. The monthly equivalent shown next to it is for guidance only and does not mean monthly installments (Section 5.1 of the Terms of Service).

3. Features and limits of the paid plans

3.1. The paid plans include the following features and limits:

Feature	Challenge	Funded	Scaled
Connected accounts	1	Up to 5	Unlimited
Trade history	6 months	Unlimited	Unlimited

Feature	Challenge	Funded	Scaled
Trading analytics dashboard	Yes	Yes	Yes
Performance calendar	Yes	Yes	Yes
UN Score	Yes	Yes	Yes
Gamification, XP and levels	Yes	Yes	Yes
Single Trade report	Yes	Yes	Yes
Weekly, monthly and yearly reports	Weekly and monthly	Yes	Yes
Discord community	Read-only	Yes	Yes
Priority support	No	No	Yes

3.2. The limit on connected accounts states how many trading accounts can be active in the user account at the same time; the sample (demo) account does not count toward it. Scaled has no account limit. Activating the 21st and further accounts may take longer.

3.3. Funded and Scaled have unlimited history. Loading trades older than 5 years may take longer. Challenge includes the trade history of the last 6 months.

3.4. On the Challenge plan, trades older than 6 months are hidden, and we delete them after this plan has been in effect without interruption for 14 days. If you move to a higher plan before then, the hidden history is shown again. Older trades of trading accounts added only by importing a statement remain hidden, but we do not delete them.

3.5. The Single Trade report is an image showing the result and chart of a single trade; you can download or share it. It carries a QR code and a verification code with which anyone can verify on our Website that it comes from us (Section 8.3 of the Terms of Service).

4. Free plan

4.1. The Free plan lasts for as long as you have a user account and until you order a paid plan. It does not create a paid subscription or any obligation to pay (Section 2.4 of the Terms of Service).

4.2. The Free plan includes a user account and a tour of the service on the sample (demo) account. It does not include connecting or importing your own trading account, creating reports, or linking to the Discord community.

5. Moving to another plan

5.1. If you move to a lower plan, the trading accounts above its limit are locked. A locked account does not sync, cannot be selected in the overviews, and no new reports can be created from it; reports already created remain available. Locking does not delete any data, and the account is unlocked as soon as the limit of your plan allows it, for example after you move to a higher plan. The history rule for the Challenge plan under Section 3.4 of the Price List also applies to locked accounts.

5.2. On the Accounts page, you can use the “Keep active” option to choose which trading account remains active instead of another. You can use this option at most once every 30 days.

5.3. When the paid subscription ends, the Free plan applies to you. All your own trading accounts are locked, and 30 days after the subscription ends we delete them with all their data, including reports and shared posters, unless you choose a paid plan again before then. Until then, you can retrieve your data under Section 12 of the Terms of Service.

6. Platforms and methods of obtaining data

6.1. The service supports trading accounts on the MetaTrader 4 (MT4) and MetaTrader 5 (MT5) platforms. The designation MT4 or MT5 does not in itself confirm support for every server or account type (Section

4.6 of the Terms of Service). When you connect an account and start typing the server name, the Website offers the supported servers. Before you order, you can check support for a specific account under Section 8 of the Price List.

6.2. You yourself choose from the following methods of obtaining data according to your broker and account (Section 4.3 of the Terms of Service). All of them are available in the paid plans, and none of them allows trade orders to be placed or modified:

a) External integrator (Section 4.3 of the Terms of Service): automatic connection of an MT4 or MT5 account on a supported server. On the Website, you enter the platform, the server, the login, and the investor password.

b) The unalyze Connect app (the installation package and local assistant under Section 4.3 of the Terms of Service): a desktop app for Windows or macOS that transfers MetaTrader 5 account data from your computer. You add the account on the Website, and the app uses the investor password stored with us. It transfers data only while your computer is on. It cannot be used on a phone and does not support MT4 accounts.

c) Manual import of a statement: you upload the statement that MetaTrader saves on your computer, from MT4 as an .htm file and from MT5 as an .xlsx file. An account added from a statement does not sync by itself; you update it by uploading a newer statement, or you set up an automatic connection for it. If a trading account contains data from a statement, its Single Trade reports do not have a verification code.

7. Technical requirements

7.1. To use the Website, you need a device with an internet connection and one of these browsers, with JavaScript enabled and necessary cookies allowed: Google Chrome or Microsoft Edge version 111 or later, Mozilla Firefox version 128 or later, or Safari version 16.4 or later.

7.2. For an automatic connection, you need an MT4 or MT5 trading account on a supported server and its investor password, that is, a read-only password. We do not accept the master password (Section 4.4 of the Terms of Service).

7.3. The unalyze Connect app requires a computer with Windows 10 or 11 (64-bit, x64) or a Mac with Apple silicon and macOS 14 or later, connected to the internet, and an MT5 trading account.

7.4. The statement for import must be in English (switch MetaTrader to English before saving the statement), the file may be no larger than 4 MB, and the account's server must support statement import. You save a statement from MT4 as a Detailed Report (.htm) and a statement from MT5 as Report → Open XML (.xlsx).

7.5. For the Discord community, you need your own Discord account, which you link to your user account in Settings (Section 8.5 of the Terms of Service).

8. Checking account support before ordering

8.1. Before you order, you can check whether your specific trading account is supported and which data transfer methods are available for it (Section 4.6 of the Terms of Service). Write to us at info@unalyze.com and state the platform (MT4 or MT5), the server name, and the transfer method you want to use. Do not include the trading account password in your email (Section 4.4 of the Terms of Service).

9. Final provisions

9.1. We maintain the Price List as a separate versioned document, and changes to it are governed by Section 6 of the Terms of Service. A running subscription is governed by the version of the Price List made available before you submitted your order, until a change is applied through the procedure under Sections 6, 9, and 15 of the Terms of Service (Sections 1.7 and 6.1 of the Terms of Service).

9.2. This Price List is effective from the date of its publication and applies to orders submitted from that date.
